

February 2021 Activity Update

February 2021 production averaged 5,765 boe/d, compared to 6,083 boe/d in January. Volumes were comprised of 15% light oil and 35% total liquids. Production volumes were lower mainly due to natural declines, shut-ins for offsetting fracs occurring in the Ferrier area, and freeze offs during the extreme cold weather in the month.

Petrus began it's Q1 2021 capital program with the drilling of 1 operated well and 2 non-operated Ferrier wells (2.07 net) which were all spud in February. Capital expenditures of \$3.5 million during the month were mostly related to drilling of these wells. It is anticipated that these wells will be on production by the end of the first quarter.

Petrus ended February with \$77.0 million drawn on its revolving credit facility which had a borrowing base of \$83.0 million at month end.
